

CoPilot Live Truck v8

Welcome Screen

On the Welcome screen there is a quick menu which allows you to easily enter a **Destination**, select **My Places**, set your **Mode of Travel** and access our range of useful live information services. To close the quick menu, select the cross.

Quick Options

You can change the way your Copilot Live v8 Truck is used for navigation through the **Options** button or the main **Menu**. Once you've entered a destination and selected **GO**, Copilot Live v8 Truck will calculate your route and begin guiding you. Select the **Options** button in the driving view. The following Options are available:

- Switch between the **2D** or **3D** driving view.
- Show the **Safety View**.
- Display the **Itinerary** driving view.
- Change the **Volume** using the < and > arrow buttons, or select **Mute**.
- Select your **Mode of Travel** by choosing **Truck***, **Auto**, **Walking**, **RV**, **Motorcycle** or **Bicycle**.
- Choose to display Copilot Live v8 Truck in **Portrait** or **Landscape**.
- **Rotate Map** to swivel the map more to the left or right.
- Show or hide a **Compass** in the map view.

** This option is exclusive to Copilot Live v8 Truck*

Mode of Travel

Your Copilot Live v8 Truck will work out the best route and guide you depending on how you're traveling. Choose from **Truck***, **Auto**, **Walking**, **RV**, **Motorcycle** or **Bicycle** to set your mode of travel.

** This option is exclusive to Copilot Live v8 Truck*

Setting a Destination

Entering an Address

- Select **Menu > Destination > Address**.
- Enter the city/town name or zip code of your destination.
- Select the correct city or area when it appears in the list below. Scroll down to see more address options matching what you have typed.
- Enter the first three or four letters of the street name. As you enter the street name, Copilot Live v8 Truck will list potential matches. Select the correct street name when it appears in the list below.
- Enter a house number. Then, select the house number you entered or the nearest house number. To skip this step, select **No House Number**.
- Copilot Live v8 Truck may display a list of address matches. Select your required address from the list.
- If you select **View on Map**, a map of the address entered will be displayed.
- Press **Cross Street** to select a street which intersects with the one you entered.
- A screen will then appear confirming the address you entered.
- Select **GO** to start navigating your route.

There's more you can do before you start your journey.

- Select **Save as Favorite** to add the address to your favorites list.
- Select **Show Route** to set the routing type which best suits you.
- **Routing Type:** Choose whether you want CoPilot Live v8 Truck to choose the most **Practical route** or the **Shortest route**.
- **Toll Roads:** Choose to **Allow Tolls**, **Avoid Tolls if Possible** or **Always Avoid Tolls** along your route.
- Choose whether to display the **routing type** screen by **checking** or **unchecking** the box.

Points of Interest

Copilot Live v8 Truck not only guides you to your destination, it also knows all the useful places you might need on your journey.

Running low on fuel? Looking for a place to park? Or want to find a nearby restaurant?

Your Copilot Live v8 Truck comes with millions of Points of Interest (POIs) including Restaurants, ATMs, Gas Stations, Rest Areas - as well as truck specific POIs including Truck Stops, Weigh Stations and CAT Scales.

You can search for Points of Interest found nearby, on your route or in a different city.

To set a Point of Interest as your destination:

1. Select **Menu > Destination > Points of Interest**.
2. Choose a location for where you would like to search for a POI. The options are:
 - **Nearby** - to find POIs close to your current location
 - **In different city** - to search for POIs in a particular town or city

- **On my route** - to find POIs which are along your route
 - 3. Copilot Live v8 Truck will display a list of the most commonly used POI categories.
 - 4. You can search for a POI by name, or by category. Commonly used POI categories are displayed on the first screen, including:
 - Gas station
 - Restaurant
 - Hotel
 - Airport
 - Rest Area
 - Commuter rail stations
 - Truck Services* - includes fuel stops and weigh stations for trucks.
- * *Exclusive to Copilot Live v8 Truck*
5. You can select **More Categories** to scroll through additional POI categories.
 - Select a POI from the list to add it as a destination. Copilot Live v8 Truck will display the POI on a map with address details and the phone number if available.
 - Press **Call** to contact the POI using your mobile device.
 - Select **GO** to start navigating to the POI.

You can also <http://www.alk.com>.

Narrow your search of POIs by selecting the sub-categories available and search for a specific brand, landmark or POI name.

- Select **Show Map** to display all POIs search results on a map.
- To return to the POI search result list, select **Show List**.

Navigate to a Contact

Copilot Live v8 Truck can use the address data saved in your mobile device's address book, to guide you to that specific destination.

- Select **Menu > Destination > Contact**.
- Enter the first three or four letters of your contact name. As you do this, Copilot Live v8 Truck will display a list of names starting with these first few letters. Select your required contact from the list.

Note: You may need to enter the city, street name and house number of your Contacts' address if Copilot Live v8 Truck cannot recognize the address.

Pick on Map

You can select a point on a map to enter it as your destination.

- Select **Menu > Destination > Pick on Map**.
- A map of the area around your current location will be displayed. Pan and zoom around the map and select your desired location.
- Select **GO** to navigate there.

Intersection

You can set your destination at the point where two streets meet:

- Select **Menu > Destination > Intersection**.
- Enter the city/town name or zip code of your destination.
- You will be asked to enter the first street and then the second intersecting street.
- Copilot Live v8 Truck will calculate your route to the point where the two streets meet.

Coordinates

If you know the latitude and longitude of your destination, you can enter them directly into Copilot Live v8 Truck.

- Select **Menu > Destination > Coordinates**.
- Choose to set the latitude and longitude in **Degrees Minutes Seconds, Decimal Degrees** or **Decimal Minutes**.
- Enter the latitude and longitude in the appropriate format depending on which option you selected.
- Select **GO** to begin navigating your route.

Delete Next Stop

Once you have planned a route and selected **GO** to start navigating, you may decide not to go on to your next planned destination.

To delete the next destination on your journey, simply select **Menu > Delete Next Stop**

Save Current Location

You can save your current GPS location as a destination so you can enter it quickly next time. Here are some situations when this feature might be useful:

- Once you've parked, save the location so you can find your way back to your vehicle later
- When you're traveling you can save the location of the place where your staying

To save your current GPS location:

- Select **Menu > Save Current location***
- Enter a name for the current location then press **OK**.

The location will be saved in your Favorites list.

**GPS fix required*

My Places

My Places provides quick and easy access to your **Home**, **Work**, **Recent** and **Favorites** destinations.

Home

Save your home address so you don't have to enter it every time you wish to be guided there.

- Select **Menu > My Places > Home**.
- Enter your home city/town name or zip code. Select the correct city or area when it appears in the list below the city field. Scroll down to see more address options matching what you have typed.
- Enter your street name.
- Enter your house number. Select the house number of the street entered, the nearest house number or **No House Number**.
- Press **GO**.

Work

Save your work address so you don't have to enter it every time you wish to be guided there.

- Select **Menu > My Places > Work**.
- Enter your work city/town name or zip code.
- Select the correct city or area when it appears in the list below the city field. Scroll down to see more address options matching what you have typed.

- Enter your street name.
- Enter the number of the street of your work address or select **No House Number**, to skip this step.
- Press **GO**.

Recent

Recent provides quick and easy access to the last 50 destinations that you entered.

- Select **Menu > My Places > Recent**. Note: Your recent list reaches the 50 destination limit each new address will replace an older inactive address.
- To navigate to one of your recent destinations, simply select a recent destination from the list then press **GO**.
- To delete your recent destinations list, select **Menu > My Places > Recent > Clear All**.

Favorites

You can save destinations to your Favorites list, so you can access them quickly.

- Select **Menu > My Places > Favorites**.

Save your favorite destinations

- To add a new destination to your favorites list, select **Add New**.
- Enter the destination by inputting an address or through any of the other ways outlined to enter a destination.
- When you've successfully added the address or location, it will appear in your favorites list.

Edit or Delete your Favorites

To edit or delete a location in your favorites list:

- Press **Edit**.
- Select a favorite then choose to **Edit, Delete or Delete All**.
 - **Edit** will open a screen which lets you enter a name for your favorite, change the address details, assign the favorite as Home, Work or Other.
 - **Delete** will erase the selected location.
 - **Delete All** will erase all the locations in your favorite(s) list including your Home and Work addresses.

*Note: You will be asked to confirm your wish to delete an/all item(s). If you select **Yes** the*

address/es will be lost.

Quick Stop

Quick Stop helps you locate a gas station, restaurant, hotel, Truck Service* or Repair Center** near you, quickly and easily.

For example, when traveling on a long journey, you can use the Quick Stop feature to help you find relevant services and call them using your phone.

How to use Quick Stop to find a local facility

1. Select **Menu > Quick Stop**.
2. Select the type of facility you require. Choose from one of these options:
 - Gas station
 - Restaurant
 - Hotels
 - Truck Services*
 - Vehicle repair**

**Exclusive to Copilot Live v8 Truck*

***Exclusive to CoPilot Live v8*

3. Select a facility from the list or choose **Search by Name** to start typing the name of a facility and select the one you want when it appears in the list. For example, to look for a specific hotel, begin to type 'Hil' then select 'Hilton' to add this hotel as a destination.
4. Copilot Live v8 Truck will display the facility on a map with address details and the phone number if available.
 - Press **Call** to ring the facility using your mobile device.
 - Select **GO** for Copilot Live v8 Truck to start guiding you to the facility.

You can also?

- Select **Show Map** to display all nearby facilities on a map. To return to the facilities list, select Show List.
- Press **Cancel**, to stop searching for facilities.

Detour

Once you have planned a route, you may need to take a detour or find an alternative route to reach your destination. Here are some situations when the detour feature might be useful:

- You notice traffic congestion, diversions and road works affecting your journey.
- You might want to avoid routes due to known roadwork maintenance.

Find an alternative route

- To change your route select **Menu > Detour > Alternate Route**.
- Copilot Live v8 Truck will calculate and map alternative routing
- If you want to use the alternative route to reach your destination, select **Accept**.
- If you prefer to use the original route after all, select **Decline**.
- Once you start traveling along the new route, if something unexpected happens, you can always return to your original route by selecting **End Detour** from the detour options.

Find an alternative road

To get around a road or intersection which you would prefer to avoid while reaching your destination:

- Select **Menu > Detour > Avoid Roads**.
- Use the itinerary to select the road you want to avoid from the list.

Copilot Live v8 Truck will calculate an alternative route changing the distance and time of your actual journey.

- If you decide to avoid this road and use the alternative route, select **Accept**.
- If you want to look for another different road, select **Clear**.
- If you prefer to use the original route and not avoid any particular roads after all, select **Cancel**.

Once you start traveling along the new route, you can at anytime select **Clear Avoided Roads** to return to your original route.

Copilot Live v8 Truck can only recommend an alternative route or different road when a sensible alternative exists.

Plan or Edit Trip

Important: For safety reasons, always plan your journey before you start driving and ensure that your device is securely mounted.

Entering Multiple Destinations for your Journey

Your Copilot Live v8 Truck allows you to plan a journey that includes multiple destinations.

- Select **Menu > Plan or Edit Trip**.
- Then select **Add Stop** and choose **Address**.
- Add the first address in the same way as described in the Entering an Address section.
- Select **Add Stop** again to add your second, third, fourth, etc. addresses.

Customizing your Journey

Once you have planned a journey with multiple destinations, you can change the order in which they appear.

- Select the destination you wish to move.
- A pop-up menu will appear containing a list of options.
- Select the **Move Up, Move Down, Move to Start or Move to End** button.
- The selected stop will move to its new position in the trip list.

Show on Map

- Select **Menu > Plan or Edit Trip**.
- Select **Add Stop** and choose one of the destination entry options.
- Select a destination from the Plan Trip list.
- A pop-up menu will be displayed showing a list of options.
- Select **Show on Map** to display the destination on a map.

Setting Waypoints

Copilot Live v8 Truck can route you through a certain point without considering it as a stop. By setting Waypoints you can adjust CoPilot's route, to calculate a detour via the waypoint.

- Select **Menu > Plan or Edit Trip**.
- Select **Add Stop** and choose one of the destination entry options described in Setting a destination.
- The destination entered will appear on the Plan Trip list as a Stop, with a flag icon next to it.
- Select the destination you wish to change to a Waypoint.
- A pop-up menu will appear containing a list of options. Select **Set as Waypoint**.
- The address will now be listed as a Waypoint, with an arrow icon in front of the address or place to indicate that is it a Waypoint.

Tip: To change a Waypoint back to a Stop, select the destination and choose Set as Stop from the pop-up menu.

Saving destinations in your planned trip as favorites

You can save addresses listed on the Plan Trip list as favorite destinations so you can access them quickly.

- Select the address you wish to save as a favorite.
- A pop-up menu will appear containing a list of options. Select **Add to Favorites**.

Delete a Destination in your Planned Journey

To remove a destination from the Plan Trip list:

- Select the destination you wish to delete.
- A pop-up menu will appear containing a list of options. Select the bin icon.
- To confirm the deletion, select **Yes** in the Are you Sure? window.

Send Location

Once you have planned a route for your journey, you can share a destination with others via SMS. Here's how:

1. Select a destination from the Plan Trip list.
2. A pop-up menu will appear showing a list of options. Select **Send This Location**.
3. Do one of the following:
 - Enter the phone number of the person you would like to send the destination. Select **Preview Message**.
 - Press **Select from Contacts** to choose a contact saved in your mobile devices' contacts directory. To do this, start to type the name of your contact and select their name when it appears in the list, or just scroll the list and select their name when shown.
4. Copilot Live v8 Truck will display the destination you want to send on a map alongside a preview of the standard message to be sent to your chosen recipient.
5. To change the message, select **Edit** and type your new message.
6. Select **Send** to share the destination with your contact. Information about the destination will be sent via SMS.

When traveling, you can send your location to others via SMS¹

1. Select **Menu > Send Location** and choose **Current Location** to send details of where you are or select **Next Destination** to send details of where you are going.

2. Do one of the following:

- Enter the phone number of the person you would like to send your current location/next destination. Select **Preview Message**.
- Press **Select from Contacts** to choose a contact saved in your mobile devices' contacts directory. To do this, start to type the name of your contact and select their name when it appears in the list, or just scroll the list and select their name when shown.

3. Copilot Live v8 Truck will display your current location/next destination on a map alongside a preview of the standard message to be sent to your chosen recipient.

4. To change the message, select **Edit** and type your new message.

5. Select **Send** to share your current location/next destination with your contact. Information about the destination will be sent via SMS. ¹GPS fix required.

Optimizing Stops

Copilot Live v8 Truck has an Optimize Stops function, which will automatically rearrange the stops within a trip to create the most efficient order. When you have planned a trip with more than 3 stops:

- Select **Options**
- Then **Optimize Stops** from the pop-up menu.

Copilot Live v8 Truck will take a few seconds to reorder your stops for the most efficient journey.

*Note: Your start point and final destination will not be altered. However, if you want the final destination to be included in the optimization, select Options from the pop-up menu select **Take Breaks** and check **Optimize Final Destination**.*

Estimated Fuel Costs

You can calculate the estimated fuel costs for a trip.

- Select **Options**.
- Select the '**Show Estimated Fuel Costs**' checkbox if you would like to display the fuel costs each time you calculate a trip.
- Enter the average Miles per Gallon (Average mpg) for your vehicle.
- Set your currency using the pick list then enter the average cost per gallon.
- Select **OK**.

Take Breaks

You can set Copilot Live v8 Truck to alert you to take a break at regular time intervals during a trip duration. This facility is for information purposes only and at the user's discretion.

- Select **Options**.
- Select the **Take Breaks During Trip** checkbox
- **Break Every**: Select a time interval which you would like to take a break.
- **Break For**: Choose how long you would like to take a break for at each break.
- Select **OK**.

Saving a Trip

When you have finished entering all your destinations, you can save your trip to access at a later date, rather than start driving right away.

- Go to **Options**
- Select **Save**.
- Enter a name for the trip you are saving. Press **Save** and the trip will be saved.

Loading a Saved Trip

- Select **Options > Load**.
- Select the trip that you would like to load from the list and press **Open**.

Deleting a Planned Trip

- Select **Clear**.
- You will be asked to confirm this selection. To continue with deleting the trip select **Yes** in the **Are you Sure?** window.

Route Preview

With Copilot Live v8 Truck you can preview your journey, before it begins.

Select **Preview** and choose one of the following options:

1. **Route Demo**: Shows the route as if driving the journey. In Route Demo, there are a range of preview options. To access these and to adjust the demo, select the demo button.
 - The options are rewind, fast forward, pause, play, stop or play the demo from the beginning. You can also speed up the demo by selecting **Faster** or slow it down by selecting **Slower**.
 - In addition to this you can also choose to playback an existing GPS track of a previous or planned journey:

- Select the track playback button.
 - Pick a track from the list then press **Play**.
2. **Turn Maps:** Displays a map of each turn of the journey. You can choose to see the **Next** or **Previous** turn. Press **Close** to exit.
 3. **Itinerary:** Shows each direction in a written list with the distance to each turn. Press **Close** to exit.

Routing Type

Copilot Live v8 Truck provides the ability to adjust the routing depending on the nature of journey. To do this, select the **Options** menu and then press **Routing Type**.

Choose your preference. The options are:

- 53' ft Trailer
- National Network
- Scenic Route
- International Borders Open
- Practical*
- Shortest*

**Truck Mode Only*

Please note that the Copilot Live v8 Truck default setting is **Practical**.

A pick list box allows you to choose from three options relating to toll roads. These are as follows:

- Use
- Avoid Tolls If Possible
- Always Avoid Tolls

Arrival Time

In this feature you can set a time for when you would like to complete your journey. Copilot Live v8 Truck will then generate an Estimated Time of Arrival (ETA) based upon the route.

- Select **Options**, then choose Arrival time.
- Set your time of arrival: **Hour, Minutes** (in increments of five minutes) then choose **AM** or **PM**.
- Once journey time is selected, press **OK**.

Routing Profiles

This option is only accessible when Show More Settings is selected from the Settings menu.

Use Routing Profiles to choose how Copilot Live v8 Truck routes you on your journey.

- Select **Menu > Settings > Routing Profile**.
- **Select Routing Profile** to pick an existing routing profile from the list.
- To create a new routing profile:
 - Select **New**.
 - Enter a name for the new Routing Profile, for example fastest roads.
 - Select your Vehicle Type, choose from **Truck, Automobile, RV, Motorcycle, Bicycle, or Walking**.
 - For each road type, first set Copilot Live v8 Truck to **Strongly Avoid, Avoid, Neutral, Favor** or **Strongly Favor** certain roads when calculating routes, then set your preferred speed for each one. For example, to create the fastest route for your journey, you might choose to strongly favor highways and set your speed at the maximum speed limit for that road.
 - **Toll Roads:** Choose to **Use, Avoid if Possible** or **Always Avoid** tolls along your route.
 - Select a Routing Type:
 - **Avoid Ferries:** Tick the box to avoid ferries along your route, if possible.
 - **Scenic Route:** Tick the box to be guided along a route with scenic surroundings.
 - **Avoid Propane-Restricted Tunnels**
 - **International Borders Open**

You can create a truck specific routing profile, here's how:

- Select **New**.
- Select your vehicle type as **Truck**
- Enter the dimensions of your truck
- For each road type, first set Copilot Live v8 Truck to **Strongly Avoid, Avoid, Neutral, Favor** or **Strongly Favor** certain roads when calculating routes, then set your preferred speed for each one. For example, to create the fastest route for your journey, you might choose to strongly favor highways and set your speed at the maximum speed limit for that road.
- **Hazardous Material.** Routing Hazmat allows you to customize the route according to specific cargo types.
- **Toll Roads:** Choose to **Allow, Avoid if Possible** or **Always Avoid** tolls along your route.
- **Truck Warnings:** Select your preference to when you wish to be alerted.
- Select from routing options: **Scenic Route, National Network, 53'ft Trailers, Override Restrictions** or **International Borders Open**
- **Routing Type:** Select from **Practical** or **Shortest**
- Once completed Enter a profile name so there it can be used immediately or at a later date.

Truck Routing Profile

Copilot Live v8 Truck provides turn-by-turn GPS navigation designed for professional drivers.

Copilot Live v8 Truck provides safe, reliable navigation for large vehicles, taking into account truck restricted and prohibited roads.

You can adjust Copilot Live v8 Truck's routing to suit the vehicle dimensions and load type. Here's how:

- Select **Menu > Truck**.
- Select **Routing**.
- Enter your vehicle type. Choose from Truck, Automobile, Motorcycle, Bicycle, Walking or RV (Recreational Vehicle).
- If you selected Truck above, enter the Max Height, Max Width, Total Length, Total Weight and Total Axle Weight of your truck.
- Customize your routing, by indicating your preference for a road type and setting a speed for each. For example, choose to strongly favor motorways and set the speed for freeways as 60 MPH.
- Select any hazmat restrictions that may apply to the load you are transporting. The options are:
 - None
 - Explosives
 - Inhalants
 - Flammable
 - Radioactive
 - Caustic
 - All Hazmats
- Choose how to handle Toll Roads on your route. The Options are:
 - Always Avoid
 - Avoid if possible
 - Use
- Choose whether or not to display truck warnings of known potential hazards on route.
 - Select **On** to display truck warnings, or select **Off** not to.
 - You can set the distance ahead to receive warning using the arrow buttons.
- Select from routing options: Scenic Route, National Network, 53 ft Trailer, Override Restrictions or International Borders Open
- Select the most practical or shortest routing type.
- You can save your preferences as a routing profile by entering a profile name, or you can skip this step.

To access and use a routing profile that you you've already created and saved.

- Select **Menu > Truck**.
- Select **Routing Profile**.
- Select a routing profile from the list using the arrows.

You can also manage your saved routing profiles here. You can select:

- **New** to create a new routing profile.
- **Edit** to change an existing profile. Here you will be able to update certain routing preferences. The available options are: Custom Routing Type, Tolls, Hazmat and Truck Dimensions.
- **Delete** to remove a saved routing profile.

Driving Views

Once you've planned a journey and selected **GO**, Copilot Live v8 Truck will display a driving view.

You can choose from a number of different driving views.

Select **Menu > Driving Views** then pick one of the following:

- **3D** shows your current position, next turn and surrounding roads on a map with a three dimensional perspective
- **2D** shows your current position, next turn and surrounding roads on a map with a two dimensional perspective
- **Driver Safety** view is recommended for safer driving. Driver safety displays a simple turn arrow with concise instructions about your next turn in large type. Copilot Live v8 Truck will change to a map view as you approach a turn.
- **Itinerary** view is a plan for your journey which includes a list of all destinations, waypoints, turn instructions and distances.
- **2D Next Turn** displays your current location and next turn on a 2D map.
- **2D Destination** shows your planned route on a two dimensional map.
- To change between a map style for the day or night, choose **Day Map** or **Night Map**.

Tip: Take a closer look - Use the + and - buttons in 2D or 3D driving views to zoom in or out of the map view.

To use a map style for the day:

- Select, **Menu > Driving Views > Day Map**

To use a map style for the night:

- Select, **Menu > Driving Views > Night Map**

Full and normal screen mode

To display 2D or 3D driving views in full screen mode, select the  button. Select the  button to return to normal mode.

Delete Next Stop

Once you have planned a route and selected **GO** to start navigating, you may decide not to go on to your next planned destination.

To delete the next destination on your journey, simply select **Menu > Delete Next Stop**

Save Current Location

You can save your current GPS location as a destination so you can enter it quickly next time. Here are some situations when this feature might be useful:

- Once you've parked, save the location so you can find your way back to your vehicle later
- When your traveling you can save the location of the place where your staying

To save your current GPS location:

- Select **Menu > Save Current location***
- Enter a name for the current location then press **OK**.

The location will be saved in your Favorites list.

*GPS fix required

Live Information Services

CoPilot Live's Live Services can help make every journey better by providing real-time information about your location or route via a phone's mobile internet connection. Services include live traffic reports on route, weather forecasts and details about fuel pricing nearby.

In addition, you can share your location and ETA at your destination in real-time online.

NOTE: Live Services require a mobile Internet connection and availability varies by CoPilot product and region. Premium Live Services require an additional subscription.

Live Local Search

With CoPilot Live Local Search, you can use the Internet for real-time searches to find any product, service, place or, business in the area locally to you.

Simply type in what you are looking for, choose from a list of search results then let Copilot Live v8 Truck navigate you there.

- Select **Menu > Live Services > Live Local Search**.
- Type in any search word to find what you need to locate. Press **Continue**.
- Select **Nearby** to find this locally, or choose **In another city** to key in the city and address details of where you would like to search. A list of search results will be displayed.
- Select a place from the list. Copilot Live v8 Truck will display the place on a map with address details and the phone number if available.
 - Press **Call** to contact using your device.
 - Select **GO** to begin navigating there.

You can also select:

- **More Results** to broaden the search area.
- **Show Map** to display all search results on a map. To return to the search result list, select **Show List**.

Live Traffic Service

Our Live traffic service helps you plan the best route for your journey by keeping you up-to-date with the latest traffic information automatically via the mobile Internet.

Copilot Live v8 Truck can warn you of any traffic incidents found nearby, on your route or in a city that you are traveling towards.

You will be asked if you want to continue along your current route. If not, Copilot Live v8 Truck can recommend an alternative route.

A traffic bar is displayed in driving views, showing you how many and how far ahead traffic incidents are reported.

To make your journey more relaxed, check for traffic conditions in other locations before you set off.

NOTE: This is a Premium Live Service (PLS). PLS is a subscription based service. This Premium Live Service is suitable for all CoPilot Live users and is not truck-specific. Live Services require a mobile Internet connection and may incur data charges from your mobile network.

Setting up the Traffic Service

Traffic information delivered via the Mobile Internet

- Select **Menu > Live Services > Live Traffic > Traffic (GPRS) Connect**
- To enable wireless communications, select **OK**.

Note: To use traffic information delivered via the mobile Internet, you will need to have wireless Internet enabled on your mobile device. To find out if your device has wireless Internet or if your SIM is data enabled, please contact your mobile network operator. Using wireless internet with the live service may result in data charges from your mobile network operator.

Search for Traffic Incidents

To search for traffic incidents near to your current location:

- Select **Menu > Live Services > Live Traffic > Nearby**

To search for traffic incidents on your route:

- Select **Menu > Live Services > Live Traffic > On my route**

To search for traffic incidents in a City:

- Select **Menu > Live Services > Live Traffic > In another city**.
- Enter the city/town name or zip code of where you would like to check for traffic incidents.

Using Traffic Incident Reports

Copilot Live v8 Truck will display traffic incidents reported nearby, on your route or in a city. To view more detailed information about a traffic incident like severity, average traveling speed, lane or road closures:

- First select a road with reported traffic incidents from the list. This will display more detailed information relating to the incidents highlighted.
- Select from the following options:
 - Pick a specific incident to show a more detailed traffic report.
 - Choose to either **Ignore** or **Avoid** a traffic incident.
 - **Map** to display the incidents on a map.

For all reported traffic incidents on a road, you can choose <http://www.alk.com>.

- **Map** - to display all reported traffic incidents on a map.
- **Ignore** - to continue on your planned route.
- **Avoid** - calculates a route which avoids all reported incidents.

You can also choose <http://www.alk.com>.

- **Map** - to display all reported traffic incidents on a map.

Traffic Settings

To adjust the alert settings and to define how Copilot Live v8 Truck uses GPRS traffic information, select:

Menu > Live Services > Live Traffic > Settings.

Then select from these options:

- **Wireless Traffic:** Select GPRS Wireless to receive traffic information using the mobile Internet
- **Speech:** Choose under which circumstances traffic incidents are spoken by Copilot Live v8 Truck. The options are **Always**, **Never** or **Only when driving**.
- **Updates:** Copilot Live v8 Truck will update the traffic information it receives at the time interval chosen here.
- **Range:** Copilot Live v8 Truck will provide traffic information within the radius defined here, based on your GPS position.

Live Link™

The Live Link application in CoPilot Live is a free to use* service that allows you to share your location on-screen with other CoPilot users and online with friends, family and colleagues.

By visiting the Live Link website at <http://live.alk.com> invited personnel can login and send you new trip locations and other comments for display on screen via Instant Messaging, directly into your Copilot Live v8 Truck application.

In addition, you can use Live Link to organize your own CoPilot Live Community. View the locations of all your CoPilot Live friends and send them Instant Messages - all from your mobile phone.

NOTE: To use this service, you will need to create a CoPilot ID. Live Services require a mobile Internet connection and may incur data charges from your mobile network.

Using Live Link

When you first setup your Copilot Live v8 Truck, you will be asked to create a CoPilot ID. Use this to login to Live Link by going to:

- **Menu > Live Services > Live Link.**
- Select **Connect** to access the Mobile Internet.

Once connected, you can do the following:

- **Add/Delete friends** - Invite other CoPilot Live users to become friends. You and the other CoPilot Live user will be connected if the invitee accepts the invitation.
- **Block buddies** - You can hide your status from all friends globally or on an individual basis.
- **Show Status** - Displays which of your friends are on and offline.
- **Pending** - Means that the invitee has not accepted your invitation yet.
- **Alert When User Signs On** - If this is checked on, a small alert will be displayed.
- **Send Text/Destination message** - You can send text and trip messages to friends.
- **Edit the Display name** - You can customize the Display name of your friend.

You can invite others to share your location in real time on the Live Link web site. An email will be sent to your friend explaining how to view your location. You can of course switch off Live Link location sharing at any time if you do not wish to be tracked.

Live Weather Service

Copilot Live v8 Truck makes it easy to check the weather conditions and forecast at your current location, destination, or any city.

Instantly get current weather or a 5 day weather forecast at the touch of a button.

CoPilot Live services require a mobile internet connection and may incur data charges from your mobile network.

- To check weather at your current location, select **Menu > Live Services > Live Weather > Local weather**
- To check weather at your final destination: select **Menu > Live Services > Live Weather > At my destination**
- To check weather in a city: select **Menu > Live Services > Live Weather > In another city**. Enter the city/town name of where you would like to view conditions.

Using weather reports

Copilot Live v8 Truck will show the current weather and a 5 day forecast.

- Select a day to view more detailed weather information.

Settings

Personalize your Copilot Live v8 Truck through the settings menu.

The first time you start Copilot Live v8 Truck, the settings for some of the more advanced features might be hidden. This is to help you get started with the key features quickly and easily.

To show more settings, select **Menu > Settings > Show More Settings**.

To reduce the number of settings displayed, so you can easily access those you might use most often, select **Menu > Settings > Show Fewer Options**.

Map Styles

Copilot Live v8 Truck offers a range of industry standard and attractive map styles.

Select **Menu > Settings > Map Styles**.

You can set a different map style for the day and night time.

- To set a map style for the daytime use the **Day** map style list.
- To set a map style for the night-time, use the **Night** map style list.

Copilot Live v8 Truck will automatically switch between the day and night map styles you have selected when it starts to get light or dark outside. Copilot Live v8 Truck will use the UTC time (provided via GPS) if available, or the time set on your device.

Map Display

To adjust how the map is displayed on your screen:

Select **Menu > Settings > Map Display**

- **2D Map Rotation:** Choose Heading Up to always be traveling upwards on the screen, or select North Up to keep the map static as you travel along your route.
- **Turn Restrictions:** Choose whether to display turn restrictions by checking or unchecking the tick box.

Sound

To adjust the sound on your Copilot Live v8 Truck:

- Select **Menu > Settings > Sound**.
- You can increase and decrease the volume using the < and > arrow buttons.
- Select the tick box to **Mute** the sound.
- To turn off the **button click sounds** that occur when you touch your keypad, uncheck the tick box.
- You will hear a Welcome greeting when you launch Copilot Live v8 Truck. If you prefer not to hear this greeting, uncheck the '**Say Welcome to CoPilot Live**' tick box.

GPS

You may need to setup your GPS receiver before you can begin navigating.

Initial setup takes just a few minutes; before you start, select the type of GPS receiver you are using to display the relevant instructions.

Build-in GPS Receiver

If your mobile device has a built-in GPS receiver, Copilot Live v8 Truck will automatically use this for navigation.

To setup your built-in GPS receiver manually:

- Select **Menu > Settings > GPS > Setup GPS**
- On the Setup GPS Receiver screen choose Search for GPS connection.
- Copilot Live v8 Truck will automatically find and connect to the GPS receiver in your device.
- Once GPS setup is complete, select **OK**.

You can also set up your build-in GPS receiver using the Advanced Options, here's how:

- Select **Menu > Settings > GPS > Setup GPS**
- On the Setup GPS Receiver screen, select **Advanced Options**.
- Select **Built-in** to use your device's built-in GPS receiver.
- Choose between **Automatic** and **Manual** setup. We recommend **Automatic** setup.

If you selected:

Automatic: Copilot Live v8 Truck will automatically find and connect to the GPS receiver in your device.

Manual: You will need to select the COM Port that the GPS is connected to and the BAUD rate for the device. Please refer to the user manual of your mobile device for this information.

- Once GPS setup is complete, select **OK**.

NOTE: CoPilot Live v8 Truck must recognize and be able to connect to your mobile device's built-in GPS to use it by default. You may need to try connecting to it manually if CoPilot Live v8 Truck can't connect to it automatically.

Bluetooth GPS Receiver

You will need to create a partnership between your Bluetooth GPS receiver and mobile device before you can begin navigating. Here's how:

- Switch on your Bluetooth receiver.
- Select **Menu > Settings > GPS > Setup GPS**.
- On the Setup GPS Receiver screen, select **Advanced Options**.
- Select Bluetooth as your GPS receiver type. Copilot Live v8 Truck will automatically begin searching for Bluetooth devices in your immediate vicinity. Once it has completed the search it will display a list of all nearby Bluetooth devices.
- Select your GPS receiver from the list to pair it with your mobile device.

GPS Performance

It's important that the location, date and time are set correctly on your mobile device to ensure that the GPS information you receive is accurate.

The first time you use a GPS receiver it may take a few minutes to determine your current position. In the future, your position will be found much faster.

To ensure you have a strong GPS signal, make sure that the GPS receiver has a clear line of sight to the sky. Large objects, like big trees and tall buildings, can sometimes interfere with the GPS signal.

Copilot Live v8 Truck uses enhanced positioning technology to provide continued guidance even when the GPS signal is lost while traveling, like when you're driving in a tunnel. The In-tunnel mode icon will be displayed.

You will not be able to get a GPS signal inside buildings, garages, multi-level and basement car parking lots.

GPS Status

To check the GPS Status, select **Menu > Settings > GPS > GPS Status**.

The GPS Status screen shows information about the GPS signal. You can see your current latitude and longitude position, the UTC time and date, your speed and your elevation (feet above sea level).

GPS Signal Strength

To see the signal strength of GPS satellites, select **Menu > Settings > GPS > GPS Status > Satellites**.

POI Display

You can set when to display POIs on a map.

- Select **Menu > Settings > POI Display**.
- Choose to show **POIs Always, When Stopped** or **Never**.
- To see or change which POI categories should be shown on the map, select **Currently Displayed POIs**.
 - Select specific POI categories to display by checking the boxes.

POI Alerts

This option is only accessible when Show More Settings is selected from the Settings menu.

You can choose which POI categories should be displayed on screen and set the distance ahead to report for these by adjusting the POI Alerts.

- Select **Menu > Settings > POI Alerts**.
- To display POI alerts, tick the box to **Show POI Alerts**.
- You can set the distance ahead to report for POIs using the arrow buttons.
- Select whether to show POIs that are **On Route** or **Near Route**.

You can choose which POI categories to display.

- First **Select POIs to Alert**.
- Select specific POI categories to display by checking the boxes. Select OK to apply the settings.

Once you have set up your Copilot Live v8 Truck to alert for POI's, a POI icon will appear in the driving views when identified.

- Select the POI icon.

A POI Alert screen will be displayed. You can choose to select:

- Next POI to view
- Previous POI
- GO to start navigating to the POI.

Manage POIs

You can add or remove additional POIs to/from your Copilot Live v8 Truck, for example your favorite places, restaurants or other locations.

You can add POIs to existing POI categories or create your own personal categories.

This option is only accessible when Show More Settings is selected from the Settings menu.

To begin,

- Select **Menu > Settings > Manage POIs > Edit POIs**
- Press the **Add** button.
- Choose to add an address, contact, intersection, GPS location, coordinates or a photo location to your POI database.
- The next screen allows you to select a POI category in which to place your new POI or create a New Category.

To add to an existing POI category

- Select a category.
- Enter an appropriate name and press the **Continue** button. This will add the POI to this category and also the My POI data set.

To create a New Category

- Press the **New Category** button to enter a name for the personalized POI.
- You can then Pick an Image to associate with the new POI that you have created.
- Name This Place and press the **Continue** button. This new POI will then be added to the Manage POIs data set.

Edit POI Sets

This feature allows you to manage and edit POI data sets you created

- Press **Edit POI Sets**
- Select the data list that you want to adapt and press the **Edit** button.
- You can edit a specific record or add another record following the same steps outlined in **Manage POIs**.

Guidance

This option is only accessible when Show More Settings is selected from the Settings menu.

You can adjust the way Copilot Live v8 Truck guides you.

Select **Menu > Settings > Guidance**.

Turn Guidance: Your CoPilot Live shows the turn you should take after the next approaching turn. From the selection of distances, adjust the distance at which you would like to see the turn following the next turn to be displayed.

Walking Mode: When you are using Copilot Live v8 Truck while walking, select **Display Breadcrumb** to show a dotted line between your start and end destinations to help you navigate.

Driver Safety

This option is only accessible when Show More Settings is selected from the Settings menu.

You can change your Driver Safety view settings. To do this:

- Select **Menu > Settings > Driver Safety**.
- Select **Display Map Near Turns** to show a 3D map as you approach a turn.
- When Display Map Near Turns is ticked, select a distance to decide how near to a turn Copilot Live v8 Truck should switch from Driver Safety to a 3D driving view.

CoPilot ClearTurn™

NOTE: This feature is available as standard in Copilot Live v8 Truck although availability varies by region.

Copilot Live v8 Truck can provide real sign post information displayed on your screen as an additional visual aid while on the road.

CoPilot ClearTurn™ provides a realistic view at complex intersections and highway exits. The real sign post information combined with lane indicator arrows highlight the turn and provide clear, visual guidance to which lane you need to take. ClearTurn is only available in 3D driving views and in landscape screen orientation.

Your Copilot Live v8 Truck gives you clear, enhanced guidance at complex junctions and motorway exits by showing you which lane you need to be in.

- For enhanced guidance at intersections and highway exits, select **Display Clear Turn Near Exits**.
- Choose from the different distance options for when to show the lane assistance display at highway exits.
- Decide when to hide the lane assistance display as you approach a turn, select one of the

distance options.

Language and Voice

You can change the language used for all buttons, information and instructions displayed on-screen and spoken by your Copilot Live v8 Truck.

- Select **Menu > Settings > Language and Voice**.
- Choose a language from the list.
- Once you have selected a language, you can then go on to choose a voice.
- Select a voice from the list. You can:
 - Select Test to hear a sample of your chosen voice.
 - Your Copilot Live v8 Truck has two different kinds of voices:
 1. Pre-recorded voices - using basic navigating commands to guide you to your destination. i.e. 'Turn Right'.
 2. Text-to-Speech (TTS)*- a computer generated voice that provides detailed verbal instructions relating to road names, and potential truck related hazards. i.e. 'Sharp turn ahead on to Southampton Terrace'.

* TTS is a standard in Copilot Live v8 Truck.

Day and Night Mode

Set your Copilot Live v8 Truck uses different maps styles for the Day and Night, or choose Automatic to switch between the day and night map styles you have selected.

Copilot Live v8 Truck will use the UTC time if available, or the time set on your device to change automatically.

Select **Menu > Settings > Day/Night mode**.

Units of Measure

To set your preferences for the type of units used in maps and instructions, select **Menu > Settings > Units of Measure**.

Choose from **English**(distances in miles) and **Metric**(Kilometers)

Screen Orientation

Decide how Copilot Live v8 Truck should be displayed on your mobile device.

- Select **Menu > Settings > Screen Orientations**.
- The options are **Portrait, Landscape** or **Use device's settings**.
- You can also change the screen orientation of the Copilot Live v8 Truck display, by selecting **landscape** or **portrait** in the Options menu.

Backlight

Adjust your mobile device's backlight settings to save battery power.

- Select **Menu > Settings > Backlight**.
- The options are **On with GPS, Always On, On Near Turn,** or **Use Device Settings**.

Information Bar

Once you've planned a journey and selected **GO**, Copilot Live v8 Truck will display a driving view with useful information about your journey at the base of the screen.

You can decide how the information bar should be displayed and select what information is shown.

- Select **Menu > Settings > Info Bar**.

To decide how the information bar is displayed, choose from the following:

- **Single Display** - To show only one of the information options, for example your estimated time of arrival at a destination
- **Dual Display** - Lets you select two information options, for example your estimated time of arrival and distance remaining to destination.
- **Loop Single Display** - Shows all information about your journey by displaying one option then rotating to another.

Tip: You can also display the info bar by tapping on it. You can select what information is displayed. Choose from:

- Destination
- Current Road
- Nearest Crossroad
- Nearest Town
- Estimated Time of Arrival
- Estimated Travel Time
- Speed

- Distance Remaining
- Altitude
- Latitude/Longitude
- Heading

GPS Track Playback

This option is only accessible when Show More Settings is selected from the Settings menu.

Copilot Live v8 Truck automatically records your journeys as a GPS Track file.

You can playback a previously completed journey.

- Select **Menu > Settings > GPS > Track Playback**
- Select the GPS track from the list and press **Play**.

To control how the GPS track plays:

- Select **Demo**.
- You can rewind, fast forward, pause, stop or play the track again from the beginning. You can also speed up the track by selecting Faster or slow it down by selecting Slower.
- To return to the track list, select **GPS Tracks**.

Play Demo

You can watch a demonstration to see how Copilot Live v8 Truck can guide you on your journey.

Select **Menu > Settings > Play Demo**.

To control how the demo plays:

- Select **Demo**.
- You can rewind, fast forward, pause, stop or play the demo again from the beginning. You can also speed up the demo by selecting Faster or slow it down by selecting Slower.
- You can also choose to playback a GPS track. To do this, first select **GPS Tracks** then pick a track from the list and press **Play**.

Licensing

This option is only accessible when **Show More Settings** is selected from the **Settings** menu.

To see information about the license for your Copilot Live v8 Truck product, select **Menu >**

Settings > Licensing.

Information about your license includes the type of license for a given product and the features licensed.

The Licensing setting also allows you to **Upgrade** or **Deactivate** your license.

Upgrading your Copilot Live v8 Truck to include Premium Live Services

Once you've purchased an upgrade license you will receive a product key for your upgrade by email.

- Select **Upgrade**.
- Enter your product key for the upgrade.
- Activate your upgrade license following the onscreen instructions.

Deactivating your Copilot Live v8 Truck License

If you wish to deactivate your Copilot Live v8 Truck license, select **Deactivate** and follow the on-screen instructions.

About CoPilot

Information about the version, maps, POIs and product key for your Copilot Live v8 Truck application can be accessed by:

Selecting **Menu > Settings > About CoPilot**.

Restore Default Settings

You can restore your Copilot Live v8 Truck to its original factory settings.

Select **Menu > Settings > Restore default settings**.

All your settings will be cleared and reset. Your favorite and recent locations will not be deleted.

State Mileage Logs

CoPilot Live v8 Truck will automatically track state fuel mileage for state tax reporting when used for every trip. State mileage logs list the mileage totals by state and month as recorded by

CoPilot Live v8 Truck.

- To view your State Mileage Logs, go to: **Menu > Truck > State Mileage Logs**
- Select the year (Current Year: 2010 is selected as default) of the log you wish to view
- Select the month
- Select the state
- Total mileage for that state during the month will be shown as well as a breakdown of each individual trip driven that month in the selected state

Note: For accurate reporting CoPilot Live v8 Truck must be used for all trips.

Hide CoPilot

You can hide Copilot Live v8 Truck so you can use the other features and programs on your mobile device.

- Select **Hide CoPilot** from the main menu.
- To return to Copilot Live v8 Truck, select the Copilot Live v8 Truck icon on the Start menu of your mobile device.

Exit CoPilot

To quit the Copilot Live v8 Truck application, select **Exit CoPilot** from the main menu.

Uninstalling Previous Versions of CoPilot Live

Before you install Copilot Live v8 Truck you must first remove any version of CoPilot Live from your mobile device.

1. On your device, select **Start > Settings > System > Remove Programs**
2. Select **CoPilot Pocket PC** from the list of programs displayed
3. Tap on 'Remove'

Delete the CoPilot license file on your device.

1. On your device select **Start > Programs > File Explorer > MyDevice > Windows**
2. Select and delete the license file as follows:
 - CoPilot Live 7 cppo7.dat
 - CoPilot Live 6 cppo6.dat
 - CoPilot Live Pocket PC 5 cppo5.dat or cppo5.dat

Restart your device

1. Press and hold the power button to fully switch-off your mobile device
2. After re-starting your mobile device you can now install Copilot Live v8 Truck
